# BACHMANN T R A I N S

## Introducing the Bachmann Icon System

We've added a selection of new icons to help you learn more about each model in our product line, such as which historical eras each locomotive or rolling stock product is appropriate for, and what features may be included. See below for a full explanation of each icon.

### Working Headlight

Models with this symbol feature a functioning forward-facing headlight.

### Interior Lighting

Models with this symbol feature a lighted interior.

### Directional Lighting

Models with this symbol feature both forward and rear-facing headlights which will realistically dim or turn off when the direction of the locomotive changes.

### E-Z Mate® Mark II Equipped

Models with this symbol are equipped with E-Z Mate® Mark II knuckle couplers featuring magnetic coupling and uncoupling.

### Operating Pantograph

Models with this symbol feature a poseable pantograph that can be used to power the locomotive via overhead wires.

### Knuckle Couplers

Large Scale models with this symbol include prototypical AAR knuckle couplers.

### Speaker Equipped

Models with this symbol are equipped with a built-in speaker for DCC/sound operation. Refer to the model's feature list to see whether DCC is also included.

### European-Style Hook-and-Loop Couplers

Models with this symbol feature couplers compatible with British or European models.

### Ditch Lights or Marker Lights

Models featuring this symbol are equipped with additional lighting features such as ditch lights or marker lights.

### Removable Load

Rolling stock with this symbol features a freight load that can be added or removed.

### Opening Doors

Models with this icon feature poseable opening doors.

### Metal Construction

Locomotives or rolling stock with this symbol feature primarily die-cast metal construction.

### Smoke Unit Equipped

Models with this icon feature an operating smoke unit.

## Choosing Your Model Based on Era

We've categorized American railroad history into six distinct eras. Each model now includes the symbol for the eras it could be found operating in. If the prototype locomotive or rolling stock was used over a time period spanning multiple eras, all appropriate era symbols are included.

1827 - 1860  
Early Railroad Era

1860 - 1910  
Pioneer Era

1910 - 1940  
Golden Era

1940 - 1970  
Transition Era

1970 - 1990  
Second Generation Era

1990 - 2025  
Modern Era

## Model of Preserved Locomotive or Rolling Stock

Look for this symbol next to individual locomotives or rolling stock products to find models of historical pieces that are preserved today in the same paint scheme.

an E-Z Track® set, ready for DCC and Sound Installation

Item No. 01206 • Suggested price: \$799.00

NEW  
TOOLING

Concrete Tie E-Z Track®

Launched in 2000, the Amtrak® Acela® made history as the first high-speed train service in North America, running between Washington D.C., New York City, and Boston at speeds upwards of 150MPH. Now, just over 20 years later, the Acela® service continues to push the envelope for speed and modernity in the Northeast with the development of a new generation of hi-tech trains from Alstom. The Bachmann Amtrak® Acela® II Train Set features two locomotives (one powered, one non-powered), ready-to-run with analog control and speaker-equipped for upgrading to sound and DCC, a First Class passenger car, Cafe Car, and Business Class Quiet Car. Also included is an 81" x 45" oval of snap-fit nickel silver E-Z Track® with concrete ties, power pack and speed controller, and illustrated instructions.

#### Locomotive features:

- powered sound-and-DCC-ready locomotive
- non-powered locomotive with functioning lights
- precision motor
- working directional LED headlights and marker lights
- operating ditch lights and number board lights
- selector switch for choice between rail and pantograph operation

#### Passenger Car features:

## Norman Rockwell Freedom Train

an *E-Z Track*® set with *E-Z Mate*® couplers

Item No. 00767 • Suggested price: \$399.00

Bachmann is proud to honor one of America's most beloved artists, Norman Rockwell, with the *Norman Rockwell Freedom Train*. In 1941, U.S. President Franklin D. Roosevelt addressed Congress with his hopes for America after World War II, emphasizing a vision of four basic freedoms: freedom of speech, freedom of worship, freedom from want, and freedom from fear. Rockwell painted each of these freedoms as part of his desire to do more for the war effort, naming the series the Four Freedoms. This artwork would help elevate Rockwell to an icon of American culture after being printed in *The Saturday Evening Post*. In May of 1943, Rockwell joined a combined campaign by the Post and U.S. Department of the Treasury to sell war bonds and stamps through a travelling rail exhibit. Every citizen who bought war bonds through the campaign received printed copies of the Four Freedoms in return. The Freedom Train, adorned in a patriotic red, white, and blue paint scheme, rode the rails from September of 1947 to January of 1949 to 16 U.S. cities highlighting American heritage and the importance of preserving important American documents. 133 items in total were featured on the train, including Rockwell's Four Freedoms and original versions of the United States Constitution and Declaration of Independence. The classic artwork's next stop is your HO scale layout, where Bachmann's *Norman Rockwell Freedom Train* embodies the same hopeful message of its namesake.

**BALDWIN EM-1 2-8-8-4  
(SOUNDTRAXX® TSUNAMI2™ DCC SOUND EQUIPPED)**

Performs best on 22" radius curves or greater.

Price to be announced

Based on the Yellowstone design, the EM-1 was developed by the Baldwin Locomotive Works for hauling coal across the Alleghenies on the Baltimore & Ohio® Pittsburgh Division. A latecomer in steam, the massive, articulated design was the result of wartime restrictions on the construction of more technically advanced diesel locomotives. Between 1944 and 1945, thirty of these behemoths were delivered, lasting in service for just 15 years. During this period they would see operation not only on coal trains, but on mixed freights, mail, and express passenger services (thanks to being fitted with roller bearings). In later years, they could be found west of the Alleghenies hauling lake-bound coal trains, while some of their final duties included fan trips in the late 1950s. Despite at least one being earmarked for preservation, all were scrapped in the early 1960s, bringing the era of big steam on the B&O® to a close. Making its grand return to Bachmann's HO Scale Spectrum® line, the head-turning EM-1 arrives in 2025, now with thunderous Soundtraxx® Tsunami2™ DCC and sound, ensuring the legacy of these mighty machines lives on - if only in scale size.

**Features include:**

- Soundtraxx® Tsunami2™ DCC sound-equipped
- Dual-mode NMRA-compliant decoder for DCC and analog operation
- Soft-white LED directional headlight and tender backup light
- Precision motor with brass flywheel

The Pennsylvania Railroad's K4 4-6-2 locomotive, originally produced for passenger service, was considered the premier steam engine of the PRR system until the end of steam service in 1957. Quickly recognized for its ruggedness and reliability, the locomotive was one of the few used for both passenger and freight service throughout the PRR system. Known as Pennsylvania's state steam locomotive since 1987, our model is offered with a TCS WOWSound® CD-quality 16-bit 44,100Hz decoder with Audio Assist® for easy programming without CVs, as well as a Keep-Alive® device for uninterrupted operation, even over dirty track. The K4 arrives factory-set for maximum realism with a steam locomotive sound package that includes whistle, bell, blow down, cylinder cocks, water fill, coupler close and release, brake application and release, momentum, grade-crossing quill, departing and arriving station announcements, and more.

#### Additional features include:

- DCC sound-equipped for sound, speed, direction, and lighting control
- true CD-quality audio in 16-bit 44,100Hz sound
- Keep-Alive® device that keeps your engine running during power interruptions due to dirty track or loss of electrical contact
- voice-guided Audio Assist® programming tool for easy set-up of almost all decoder functionality
- dual-mode, NMRA-compliant decoder
- precision motor
- load-based chuff intensity with Chuffinity™ technology
- operating headlight
- all-metal chassis and die-cast trailing truck
- blackened-metal wheels with RP25 contours
- blackened-metal sideloads
- painted engineer and fireman figures
- separately applied parts, including injectors, pump, and piping
- metal cut levers
- E-Z Mate® Mark II couplers, front and rear

### DREYFUSS STREAMLINED HUDSON (TCS WOV SOUND® DCC EQUIPPED)

Performs best on 22" radius curves or greater.

Suggested price: \$549.00 each

Entering service in 1938, the Streamlined Hudson was one of several locomotives that would come to define the Art Deco period of design. While the locomotive remained mechanically identical to previous, non-streamlined Hudsons, the styling by industrial designer Henry Dreyfuss updated the external cladding to rival the modern appearance of its early-diesel peers. The locomotive and matching passenger car sets were primarily used on the prestigious *20th Century Limited* between New York and Chicago until being phased out in favor of diesel power in 1945. The Bachmann Dreyfuss Streamlined Hudson arrives with all of the authentic and interactive features found on the standard J3a Hudson, including dual-mode TCS WOWSound® DCC with CD-quality audio, a Keep Alive® device for uninterrupted performance, and Chuffinity™ technology for prototypical load-based chuff intensity.

#### Features include:

- DCC equipped for sound, speed, direction, and lighting control
- TCS true CD-quality audio in 16-bit 44,100Hz sound
- Keep-Alive® device that keeps your engine running during power interruptions due to dirty track or loss of electrical contact
- voice-guided Audio Assist® programming tool for easy setup of almost all decoder functionality
- Chuffinity™ technology for prototypical load-based chuff intensity
- dual-mode NMRA-compliant decoder for use on digital (DCC) or analog (DC) systems
- LED directional headlights with Rule 17 dimming
- die-cast frame and boiler
- Boxpok or Scullin drivers per prototype
- magnetically operated E-Z Mate® Mark II couplers

### NEW YORK CENTRAL 4-6-4 J-3a HUDSON (TCS DCC WOWSound® EQUIPPED)

Performs best on 22" radius curves or greater.

Suggested price: \$509.00 each

As the demand for rail travel increased in the 1920s, the need for faster, more powerful locomotives to pull the *20th Century Limited* and other express services along the New York Central's Water Level Route become clear. The solution was delivered by the American Locomotive Company in 1927, as the 4-6-4 Hudson entered service alongside its namesake Hudson River. The type quickly became a symbol of both the New York Central and fast, luxury rail travel. Factory-set for maximum realism and equipped with a TCS WOWSound® CD-quality 16-bit 44,100Hz decoder with Audio Assist®, the Hudson arrives with a steam locomotive sound package that features user-definable whistle options, bell, blowdown, cylinder cocks, water fill, coupler close and release, brake application and release, momentum, grade crossing quill, station announcements, and more.

**SIEMENS SC-44 CHARGER**  
(TCS DCC WOWSOUND® EQUIPPED)  
Performs best on 22" radius curves or greater.

Suggested price: \$499.00 each

Bachmann's DCC sound-equipped SC-44 Charger uses Siemens Mobility's original design documentation and prototype field recordings. This model includes a TCS WOWSound® CD-quality 16-bit 44,100Hz decoder with Audio Assist® for easy configuration without programming CVs and a Keep-Alive® device for uninterrupted operation, even over dirty track. The WOWSound® diesel-electric locomotive sound package includes horn, bell, prime mover, start-up/shutdown, compressor, cooling fan, coupler close/release, brake release/application, crew alert, grade-crossing quill, departing and arriving station announcements, and more. Loaded with prototypical features, the Charger brings all the sights and sounds of Siemens' diesel-electric locomotive to your layout.

**Features include:**

- ◆ Siemens-approved design
- ◆ DCC sound-equipped for sound, speed, direction, and lighting control
- ◆ TCS true CD-quality audio in 16-bit 44,100Hz sound
- ◆ Keep-Alive® device that keeps your engine running during power interruptions due to dirty track or loss of electrical contact
- ◆ voice-guided Audio Assist® programming tool for easy setup of almost all decoder functionality
- ◆ dual-mode NMRA-compliant decoder

### WOWSound®

- ◆ 10 decoder-controlled lighting functions
- ◆ directional headlights
- ◆ interior corridor work lights
- ◆ roof-mounted white and emergency red strobe lights
- ◆ marker lights
- ◆ steady/alternate flashing ditch lights
- ◆ die-cast frame
- ◆ separately applied windshield wipers, grab irons and detail parts

### GENERAL ELECTRIC DASH 8-40CW

(TCS SOUND VALUE-EQUIPPED)

Performs best on 18" radius curves or greater.

Suggested price: \$459.00 each

Entering service in 1989, the Dash 8-40CW was the first in General Electric's line of road diesels to feature the North American Safety Cab (otherwise known as the wide-cab design). It would set the standard for the basic appearance of all GE locomotives for the next two decades, becoming an icon of North American freight railroading. Bachmann's Dash 8-40CW features newly added operating ditch lights, a TCS Sound Value DCC package for sound, speed, direction, and lighting control, and comes ready-to-run on both analog and DCC-equipped layouts.

#### Additional features include:

- DCC Sound Value-equipped for sound, speed, direction, and lighting control
- Keep-Alive® device that keeps your engine running during power interruptions due to dirty track or loss of electrical contact
- dual-mode NMRA-compliant decoder
- operating headlight and ditch lights
- all-wheel drive
- blackened metal wheels with RP25 contours
- E-Z Mate® Mark II couplers

**GENERAL ELECTRIC C36-7  
(SOUNDTRAXX® TSUNAMI2™ DCC EQUIPPED)**

Suggested price: \$499.00 each

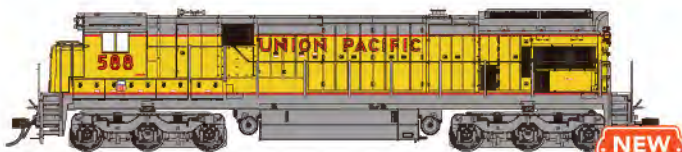

Built between 1978 and 1989, the C36-7 was the final locomotive to be offered in General Electric's successful "Dash 7" series. Capable of producing up to 3,750 horsepower, the majority of production C36-7s were purchased by China Railways and other overseas operations, while a number of examples were ordered for use by US, Canadian, and Mexican railroads. Mainline operation in the United States lasted through the mid-2000s, and examples can still be found today running on several short lines. Bachmann is excited to announce the first-ever consumer model of the North American C36-7 in HO scale. Featuring prototypical details, the C36-7 comes equipped with dual-mode DCC and Soundtraxx® Tsunami2™ Sound on Board®. Sounds featured include an authentic GE FDL16 prime mover, several horn and bell options, startup and shutdown, and air compressor.

**Features include:**

- Soundtraxx® Tsunami2™ DCC equipped for sound, speed, direction, and lighting control
- dual-mode NMRA-compliant decoder for use on digital (DCC) or analog (DC) systems
- LED directional headlights with Rule 17 dimming
- separately applied details such as railings, windshield wipers, and cut levers
- die-cast chassis
- authentic features specific to North American examples
- magnetically operated E-Z Mate® Mark II couplers

Price to be announced

Entering service in 1972 as a successor to the GP38, the GP38-2 remained in production until 1986, becoming one of the most popular four-axle road switchers of the "second generation" diesel era. A total of 2,264 examples were constructed, with the majority going to operators in the United States, Canada, and Mexico. Demonstrating efficient performance in lighter duties, the GP38-2 could be found in yards and on local freight jobs, while certain examples were geared for passenger service with commuter operators. The Bachmann GP38-2 returns to our HO Scale line with newly upgraded Soundtraxx® DCC, now featuring Econami™ sound, and new paint schemes and road numbers.

**Features include:**

- Soundtraxx® Econami™ Sound Value® equipped
- Dual-mode NMRA-compliant decoder for DCC and analog operation
- LED directional headlights with Rule 17 dimming
- Precision motor
- Die-cast chassis
- Roadname-specific dynamic brake and non-dynamic brake configurations
- Magnetically operated E-Z Mate® Mark II couplers

Performs best on 18" radius curves or greater.

Suggested price: \$225.00 each

Manufactured between 1949 and 1954, the GP7 was EMD's first successful diesel road switcher. 2,729 units were constructed over a five-year period, with EMD barely managing to keep up with demand. The type would set the stage for EMD to become one of the most successful locomotive manufacturers of the latter half of the 20th century, and despite their age, many remained in service well into the 1980s. Now in their 7th decade, a selection of examples continue to find use on short lines and tourist railroads to this day. Our GP7 comes with directional lighting and a factory-installed 8-pin socket for the DCC decoder installation of your choice.

EMD BL2 DIESEL LOCOMOTIVE (DCC EQUIPPED)

Suggested price: \$269.00 each

**DCC  
ON BOARD**

Standing for "Branch Line Locomotive" the BL2 was EMD's first foray into lighter-duty switching power, with production commencing in 1947. Designed for improved visibility for the engineer during operation, the locomotive was one of the earliest diesels to feature a wide cab and a narrow long hood, allowing for a clearer view when operating reverse movements. With styling cues taken from the streamliners of its time, the BL2 has remained popular with railfans throughout the years. Originally utilized for both freight and passenger duties on secondary lines, examples can still be found in service today, handling excursions and short-line freight runs. The Bachmann BL2 arrives with DCC on Board®, featuring new and existing tooling, authentic paint schemes, and directional LED headlights.

**Features include:**

- new and existing tooling
- highly detailed painted bodies with precision graphics
- dual-mode NMRA-compliant DCC decoder
- directional headlights with Rule 17 dimming

### 85' FULL-DOME PASSENGER CAR with LIGHTED INTERIOR

Performs best on 22" radius curves or greater.

Suggested price: \$85.00 each

In the mid-1950s, the Budd Company developed a series of full-length bi-level dome cars, offering a panoramic view for all passengers seated on the upper level, while the lower level featured a lounge area. A fleet of 14 "Big Domes" were delivered to the Santa Fe Railway in 1954, while 6 similarly configured "Great Domes" were delivered to the Great Northern Railway the following year. A number continued in revenue use into the 1990s under Amtrak®, with "Ocean View" remaining in service on the railroad until 2019. Others found further use as excursion cars on tourist railroads, while some were converted for use on corporate business trains.

### 1900s ERA 68' PASSENGER CAR

Price to be announced

With railroads solidifying their position as a staple of American transportation during the turn of the 20th century, passenger accommodations evolved to match the growing demand. Longer cars with more amenities began to appear, featuring more robust frames and trucks designed for smoother operation. Today, early 1900s-era cars such as these can be experienced at museums and tourist operations, offering a glimpse into how Americans traveled as the frontier nation industrialized. The Bachmann 1900s Era 68' Passenger Car arrives newly-tooled with prototypical detail, metal wheels, and E-Z Mate® knuckle couplers.

### TRINITY 5161 3-BAY COVERED HOPPER

Suggested price: \$59.00 each

Standing for 5161 cubic-foot capacity, the Trinity Railcar 5161 is one of the most prevalent covered hoppers currently in operation on North American railroads. Debuting in service in 1995, the type can frequently be found both in unit trains and on mixed freight manifests, with over 27,000 in service. Designed for hauling bulk commodities, the 5161 is commonly used in the transportation of grain, sugar, plastics, and dry chemicals. Bachmann's Trinity 5161 expands on our line of modern-day freight rolling stock and features separately applied components such as roof walks and brake wheels.

#### Features include:

- new and existing tooling
- authentic modern-era design
- highly detailed painted bodies with precision graphics
- separately-applied details
- magnetically operated E-Z Mate® Mark II couplers
- blackened machined metal wheels with RP25 contours

### GATX 4180 AIRSLIDE HOPPER

Suggested price: \$59.00 each

With a capacity of 4180 cubic feet, the GATX 4180 Airslide Hopper was one of the first hoppers designed to meet a growing demand for larger bulk-transport cars suitable for shipping grain and other organic commodities. Designed and constructed by the General American Transportation Corporation, more than 5000 examples entered service between 1963 and 1980. Today, these uniquely styled cars can still be found in service, with many experiencing a second life as mandated buffer cars between the locomotives and revenue cars on unit oil and ethanol trains, and at the end of the train. The Bachmann GATX 4180 arrives with precision details, blackened metal wheels, and E-Z Mate® magnetic knuckle couplers.

#### Features include:

- new and existing tooling
- highly detailed painted bodies with precision graphics
- separately applied details
- blackened machined metal wheels with RP25 contours
- magnetically operated E-Z Mate® Mark II couplers

### 50' EXPRESS REEFER

Suggested price: \$53.00 each

Refrigerated rail transportation revolutionized the produce industry in North America, allowing fresh commodities from the west to be sold for the first time in the east, and vice-versa. To expedite the delivery of these time-sensitive goods, railroads attached *Express Reefers* to their priority passenger trains, adding one or more of these specially built cars ahead of the baggage and passenger cars.

#### Features include:

- highly detailed painted bodies with precision graphics
- blackened machined metal wheels with RP25 contours
- magnetically operated E-Z Mate® Mark II couplers
- non-magnetic blackened brass axles with needlepoint bearings

### CHEMICAL TANK CAR

Suggested price: \$49.00 each

In addition to carrying essential liquids such as water, oil, and gasoline, tank cars also provide a safe and efficient means of transportation for hauling industrial chemicals. Due to the potentially volatile and sometimes corrosive nature of certain chemicals, these tank cars were designed to feature tougher construction and a specialized dome to provide greater protection for both the contents of the cars and those handling them. The Bachmann Chemical Tank Car incorporates new and existing tooling to replicate these cars in HO scale and includes detail differences per prototype, authentic road names, E-Z Mate® couplers, and blackened, machined metal wheels.

### 52' CENTER-BEAM FLATCAR with BULKHEADS

Performs best on 15" radius curves or greater

Center-beam cars are specialty cars designed for carrying building supplies such as cut wood, lumber, or drywall sheets. They are essentially bulkhead flatcars that have been reinforced with additional central supports for the side-loading of bulk materials.

### 52' AUTO CARRIER with SEDAN LOAD

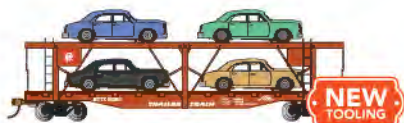

Price to be announced

As the demand for automobiles grew in the postwar era, larger dealer shipments and more efficient delivery processes were required. While it had previously been common practice to deliver vehicles in boxcars, this was a cumbersome routine, as loading involved careful maneuvering, and each car could only hold a couple of vehicles. Flatcars were also used, but while loading was more efficient, space per car was still limited. In the mid-1950s, the Frisco Railroad expanded on the latter format by constructing a second level above the flatcar deck, instantly doubling the per-car capacity. Other railroads soon followed with variations of this first iteration of the "autorack" specialized car carrier.

#### Features include:

- Newly tooled bi-level auto transport superstructure
- Detailed simulated wooden deck on the lower level
- Removable era-appropriate load of four sedans
- Detailed underframe
- Separately applied brake wheel
- Magnetically operated E-Z Mate® Mark II couplers
- Blackened metal wheels with RP25 contours

### 52' WHEEL FLATCAR with WHEEL LOAD

Suggested price: \$49.00 each

With the friction created from steel riding on steel, wheels on locomotives and rolling stock periodically need to be replaced for safety and smooth performance. When being delivered by rail, new wheels are typically transported on flatcars that have been built or modified for this specific purpose. The Bachmann 52' Wheel Flatcar represents examples of this car found from the 1950s through the early-2000s, the prototypes of which were modified from earlier general-use flatcars. Features of the model include a newly tooled wheel transport rack and load of separate wheelsets, all finished in an authentic oxide brown.

#### Features include:

- new and existing tooling
- highly detailed painted bodies with precision graphics
- removable plastic wheel load
- magnetically operated E-Z Mate® Mark II couplers
- blackened machined metal running wheels with RP25 contours

### BRITISH RAILWAYS BRAKE VAN TRACK CLEANING CAR

with international style hook-and-loop couplers

Suggested price: \$67.00 each

Brake Vans are the British equivalent of the North American Caboose. Much like their stateside counterparts, they could frequently be found at the rear of freight trains through much of the 20th Century. As technology advanced, many found a second career in maintenance-of-way operations, helping to keep the rail network moving. The Bachmann British Railways Brake Van can do exactly this for your railroad. The car's exclusive dry cleaning system features a reusable track cleaning pad to keep your rails shining and your operation trouble-free.

#### Features include:

- detailed body shell
- reusable and replaceable track cleaning pad
- all-metal wheels
- factory-installed international-style hook-and-loop couplers
- runs on all popular brands of HO track

### SHORT BODY BAY WINDOW TRANSFER CABOOSE

Suggested price: \$79.00 each

Designed for the Missouri Pacific™ in the late 1970s, the Short Body Bay Window Caboose was one of the very last caboose styles to be built for class-one operation. With End-of-Train Devices fast replacing cabooses on the rear of road trains, the Short Body Bay Window Caboose was constructed with a design that could easily be adapted for shoving or “transfer” movements, featuring a longer platform on each end of the body for external riding. The basic design was adopted by several other railroads, including the Louisville & Nashville® (ultimately continuing in service under CSX® ownership) and Southern Pacific™, while many of the original MoPac cars continued in operation long after the Missouri Pacific™ merged into the Union Pacific® system.

#### Features include:

### Magnetically Operated Knuckle Couplers

E-Z Mate® couplers make use of precision molding techniques to allow the molding of springs as an integral part of the knuckle coupler; E-Z Mate® Mark II couplers include an integrated metal coil spring. E-Z Mate® and E-Z Mate® Mark II couplers eliminate the problems and expense associated with separate coil springs.

To install E-Z Mate® and E-Z Mate® Mark II couplers, just remove the coupler pocket cover, drop in the coupler, and replace the cover. Operation is simple as well; E-Z Mate® and E-Z Mate® Mark II couplers operate with a standard metal "glad hand" and under-track magnet, and they are completely compatible with all magnetically operated knuckle couplers currently on the market. (Our under-track magnet comes with a trackside brakeman figure to indicate the magnet's position.) Coupling, uncoupling, and other yard operations are all performed with ease.

### NICKEL SILVER E-Z TRACK® AUTO-REVERSING TRACK SYSTEM

Item No. 44547 • Suggested price: \$238.00

Featuring our electronic auto-reversing *E-Z Track*®, this track set is the perfect solution for point-to-point passenger and freight transit on your layout. With a variable speed controller, you can determine the rate of travel and bring your town or city to life! Add-on track sections are also available separately (Item Nos. 44548 & 44549).

- 4 pieces of 9" straight auto-reversing *E-Z Track*®
- 4 pieces of 18" radius curved auto-reversing *E-Z Track*®
- 2 pieces of 9" straight *E-Z Track*®
- 2 Hayes bumpers
- power pack and variable speed controller
- illustrated instructions

### ELECTRONIC AUTO-REVERSING NICKEL SILVER E-Z TRACK®

Suggested price: \$52.50 each

You can expand your auto-reversing train set or track system with Electronic Auto-Reversing Nickel Silver *E-Z Track*® sections. Available in 9" straight and 18" radius curved sections, this electronically equipped track is specifically designed for the open-end track configuration of our auto-reversing track system, allowing you to go virtually anywhere on your layout.

**AUTO-REVERSING 9" STRAIGHT**  
(4 per card)  
Item No. 44548

*Note: this track will not operate as reversing track unless it is used in conjunction with train set numbers 00401, 00402, 25016, 25017, 25100, or with our auto-reversing track system, Item No. 44547.*

- 5 locomotive stalls
- 5 pieces of 9" straight track
- 5 track ends
- assembly required

### DCC CONTROL BOX with TURNOUT DECODER

Item No. 44949 • Suggested price: \$39.00

- compatible with N, HO, On30, and O scales

**DCC**  
**ON BOARD**

This control box with turnout decoder allows you to upgrade your electrically operated analog turnouts to DCC quickly and easily. To upgrade, simply replace your analog switch box with this decoder-equipped control box. Once connected, you can assign a decoder address and operate the turnout through your DCC system. Compatible with N, HO, On30, and O scales.

### HO TRACKSIDE TURNOUT DECODER

Item No. 44950 • Suggested price: \$48.00

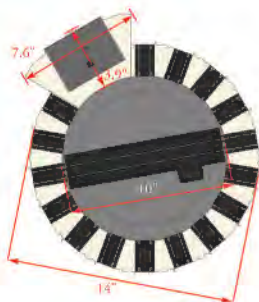

**DCC**  
**ON BOARD**

This HO scale trackside turnout decoder lets you upgrade your electrically operated analog turnouts to DCC quickly and easily. With a decoder installed inside the trackside structure, this flexible design can be used in two ways; plug-and-play use with Bachmann's E-Z Track® system is available by snapping off break-away tabs at the bottom of the structure and plugging into the structure the appropriate wires from your track power source and turnout section. Alternatively, you can make the same connections by soldering to easily hide the wires through a hole under your layout. Once connected, you can assign a decoder address and operate the turnout through your DCC system.

### DCC-EQUIPPED TURNTABLE

Item No. 46298 • Suggested price: \$319.00

**DCC**  
**ON BOARD**

#### **This DCC-equipped motorized turntable features:**

- DCC-equipped with dual-mode NMRA-compliant decoder
- track powered from track position number 4 (separate power supply not required for DCC operation)
- 16 nickel silver track positions
- gear drive
- turntable indexed to each track section for accurate alignment
- painted maintenance building
- prototypical operator's cabin
- designed for use with Bachmann's E-Z Track®
- easily adaptable to other popular track systems
- spring-loaded direction switch and wires provided for DC (analog) operation, if desired

**HO SCALE NARROW GAUGE FLETCHER, JENNINGS & CO.  
0-4-2ST TALLYLLYN LOCOMOTIVE**

Runs on N Scale track; equipped with international-style hook-and-loop couplers

Suggested price: \$179.00 each

Opened in 1866, the 2'3" gauge Tallyllyn Railway was the first narrow gauge line in the UK to operate steam-powered locomotives from the start, with predecessors having their origins in the horse-drawn wagon era. Construction of the 0-4-2ST "Tallyllyn" locomotive preceded its namesake railway by two years, and the engine has spent its entire working life on the line. Initially designed for hauling slate, and later revenue passenger service, the Tallyllyn locomotive today hauls tourists along its 7.25-mile railway, now recognized as one of the UK's premier narrow gauge heritage lines. The Bachmann Tallyllyn locomotive comes available in three prototypical paint variations, reflecting the strikingly different schemes worn over the course of its life. Scaled to HO/OO dimensions, the Tallyllyn will operate on standard N Scale or HOn30/OO9 narrow gauge track, and features die-cast metal construction with operating metal drivers.

**Features include:**

- die-cast metal construction
- highly detailed painted body with precision graphics
- international-style hook-and-loop couplers
- blackened machined metal wheels with metal drivers

Built in 1878 for the Corris Railway in Wales, Sir Haydn was employed in passenger and goods service until the line's closure in 1948, operating as Corris No. 3 under both independent ownership and as part of the Great Western Railway. In 1951, No. 3 was purchased by the newly formed Tallyllyn Railway Preservation Society and was relocated to the nearby operation. It was here that the name "Sir Haydn" was given in recognition of the former owner of the Corris Railway. Today, Sir Haydn operates alongside the Tallyllyn locomotive in excursion service and occasionally returns as a visiting locomotive to the Corris Railway, which has since reopened as a heritage operation.

## HO SCALE NARROW GAUGE TALYLLYN RAILWAY COACHES

Runs on N Scale track; equipped with international-style hook-and-loop couplers

Suggested price: \$47.00 each

Talyllyn carriages #1 and #2 were built by Brown, Marshalls & Co of Birmingham, England, in 1866 and 1867. Both were constructed with an open interior and compartmentalized seating for each door. Carriage #4 was delivered in 1867 by the Lancaster Wagon Co. and featured a more cost-effective design than its predecessors. All three coaches remain in operation on the Talyllyn Railway today, and while none are officially named, Carriage #4 is known to railway staff as "Lulu."

Built in the late 1800s to carry a variety of loads, four-wheeled waggons such as these were predominantly used by the Ffestiniog Railway to haul locomotive coal for delivery. Today, they remain in pristine condition and are found on recreation goods trains during special events. This model represents Ffestiniog Railway #22, which was renumbered #26 until regaining its original designation in 2024.

## STEAM LOCOMOTIVES

### STREAMLINED K4 4-6-2 PACIFIC (DCC ECONOMI™ SOUND VALUE EQUIPPED)

Performs best on 11.25" radius curves or greater.

Suggested price: \$479.00 each

Conceived by legendary Art-Deco designer Raymond Loewy, the Streamlined K4 was the Pennsylvania Railroad's answer to the stylish locomotive design trends of the 1940s. Rebuilt from four standard K4 locomotives for use on express passenger services such as the *Jeffersonian* and *South Wind*, the Streamlined K4s would eventually find their way onto all long-distance trains operated by the PRR. Our N Scale Streamlined K4 comes equipped with Econami™ Sound Value DCC featuring the *Soundtraxx*® steam package. Factory set for realism, the steam package offers a choice of 16 whistles, 6 bell types, 4 prototypical chuffs, 5 air pumps, and 5 dynamos, plus cylinder cocks, grade crossing quill, blowdown, brake squeal/release, coupling/uncoupling, water stop, and "all aboard" announcements with coach door operation effects - all in 16-bit polyphonic sound.

#### Features include:

- DCC sound-equipped with Econami™ Sound Value package
- precision motor
- operating headlight and reverse light
- directional Rule 17 lighting
- die-cast boiler and chassis
- blackened metal wheels and side rods

### 4-6-4 J-3a HUDSON STEAM LOCOMOTIVE

(DCC ECONAMI™ SOUND VALUE-EQUIPPED)

Performs best on 11.25" radius curves or greater

Suggested price: \$469.00 each

As the 1920s progressed, the need for faster, more powerful locomotives to pull the *20th Century Limited* and other famous trains along the New York Central's Water Level Route from New York to Chicago became clear. The answer was delivered by the American Locomotive Company in 1927, as the 4-6-4 Hudson type entered service along its namesake Hudson River. The Hudson became an iconic symbol of both the New York Central and fast, luxury rail travel. Factory-set for maximum realism and equipped with an Econami™ SoundTraxx® steam package, the locomotive offers a choice of 16 whistles, multiple variations of 6 bell types, 4 prototypical chuffs, 5 air pumps and 4 dynamos, plus cylinder cocks, grade-crossing signal, blowdown, brake squeal/release, coupling/uncoupling, water stop, and "all-aboard" announcements with coach door operation—all in 16-bit polyphonic sound.

#### Additional features include:

- DCC sound-equipped with Econami™ Sound Value package
- dual-mode NMRA-compliant decoder
- precision motor
- authentic Boxpok-style drivers
- operating headlight and tender backup light
- completely hidden drive train
- gear drive
- separate detail parts, including bell, whistle, pop valves, and handrails

### 19TH CENTURY 4-6-0 (SOUNDTRAXX® TSUNAMI2™ DCC SOUND EQUIPPED)

Suggested price: \$399.00 each

The first steam locomotive to operate in North America with the 4-6-0 wheel arrangement entered service with the Philadelphia and Reading in 1847. More railroads would come to adopt the wheel arrangement in the following decades, finding greater tractive effort in the 4-6-0 than in the 4-4-0 predecessor. The Bachmann 19th Century 4-6-0 replicates these ornate early examples, coming equipped with Soundtraxx® Tsunami2™ DCC Sound on board.

#### Features include:

- Soundtraxx® Tsunami2™ DCC equipped for sound, speed, direction, and lighting control
- Dual-mode NMRA-compliant decoder for use on digital (DCC) or analog (DC) systems
- LED headlight with era-appropriate warm glow
- Die-cast chassis
- Wood or coal tender load per prototype
- Metal side rods
- Magnetically operated E-Z Mate® Mark II couplers

Performs best on 11.25" radius curves or greater.

Suggested price: \$469.00 each

The future of long-distance passenger railroading is heading to N Scale. Based on the highly successful medium-distance SC-44 Charger, the ALC-42 displays a range of new features for cross-country service on America's most scenic and storied routes, including a unique nose design and cab door configuration. Bachmann's ALC-42 Charger has been developed in collaboration with Siemens Mobility, using original design documentation and prototype field recordings for maximum realism. Features include a TCS WOWSound® CD-quality 16-bit 44,100Hz decoder with Audio Assist® for easy configuration without CVs, and a Keep-Alive® device for uninterrupted operation, even over dirty track. The WOWSound® diesel-electric locomotive package includes an authentic horn, bell, prime mover, startup/shutdown, compressor, cooling fan, coupler close/release, brake release/application, crew alert, grade crossing quill, station announcements, and more.

#### Features include:

- Siemens-approved design
- DCC sound-equipped for sound, speed, direction, and lighting control
- true CD-quality audio in 16-bit 44,100Hz sound
- Keep-Alive® device that keeps your engine running during power interruptions due to dirty track or loss of electrical contact
- voice-guided Audio Assist® programming tool for easy set-up of almost all decoder functionality
- dual-mode NMRA-compliant decoder
- directional headlights and marker lights
- interior corridor work lights
- steady/alternate flashing ditch lights
- die-cast frame with separately applied windshield wipers, grab irons and detail parts

**EMD SD40-2**  
**(DCC ECONAMI™ SOUND VALUE EQUIPPED)**  
Performs best on 11.25" radius curves or greater.

Suggested price: \$359.00 each

Constructed from 1972 to 1989, the SD40-2 was by far the most successful of EMD's "Dash 2" series of road switchers. More than 4000 were produced, mostly for use within North America, although they have also seen use in Australia, South America, and elsewhere internationally. Their ability to handle both road freight and local switching operations ensures that they remain an essential locomotive for most major freight railroads to this day. The Bachmann SD40-2 returns to our N scale line with all-new tooling, DCC Econami™ Sound Value On Board, and a range of authentic paint schemes for the modern era.

**Features include:**

- DCC sound-equipped with Econami™ Sound Value package
- dual-mode NMRA-compliant decoder
- directional headlights with Rule 17 dimming

### GP40 DIESEL LOCOMOTIVE (DCC ECONAMI SOUND VALUE-EQUIPPED)

Performs best on 11.25" radius curves or greater

Suggested price: \$299.00 each

The GP40 was considered the top of EMD's four-axle line when first offered in the 1960s. It was visually distinguished from earlier GPs by three radiator fans along its long hood. Bachmann's N scale Sound Value model is SoundTraxx® Econami™ equipped. Factory-set for GP40 realism, the diesel package offers a choice of 5 prime movers, 16 airhorns, multiple variations of 7 bell types, 2 air compressors, and 3 couplers plus a function-activated grade-crossing signal—all in 16-bit polyphonic sound. Econami™ includes adjustable auto-notching sensitivity for prototypical operation, adjustable master volume and individual sound effect volume levels, advanced consisting, and more.

#### Features include:

### GE 44-TON SWITCHER (DCC EQUIPPED)

Price to be announced

Built between 1940 and 1956, the General Electric 44-Ton Switcher was designed to replace steam locomotives in light freight duties, primarily finding use as yard switchers for class one railroads and industrial complexes. Among only a handful of locomotives permitted to operate with a single-person crew under common carrier regulations, the 44-Ton was also an appealing choice for shortlines. The reliability of the type ensured their longevity, and some can still be found in operation today, both on tourist railroads and in revenue service. The Bachmann N Scale 44-Ton Switcher returns with new road numbers and paint schemes never before offered in this scale.

### OLD-TIME PASSENGER CARS

Price to be announced

In the late 1800s, railroads were spreading fast across North America. Trips that took days by stagecoach could now be completed in a few hours with far more relative comfort. Coach Cars were designed exclusively for passengers, while Baggage Cars were configured for transporting goods and mail. Other cars known as "Combines" were built to transport both passengers and cargo.

#### Features include:

- 19th-century design
- Separately applied end platform handrails and truss rods underneath the car
- Magnetically operated body-mounted E-Z Mate® Mark II couplers
- Blackened metal wheels with RP25 contours

### 55' STEEL COIL CAR with COIL LOAD

Suggested price: \$59.00 each

Steel Coil Cars are specialized freight cars designed to carry rolls of sheet metal for industrial use. Early examples debuted in the 1960s, and today the cars are a common sight on freight trains across North America. These new additions to our N Scale line feature a newly tooled chassis, two prototypical hood styles replicating both early and more recent designs, and a load of six removable "steel" coils that can be placed in the prototypical cradles within the cars.

#### Features include:

### 250-TON CRANE & BOOM TENDER

Price to be announced

Critical to the maintenance departments of most major 20th century railroads, steam-powered Crane Cars and Boom Tenders provided the means to lift and maneuver heavy equipment, from track and bridge sections to railcars being recovered from a derailment. Returning to our N Scale line with new paint schemes and road numbers, Bachmann's Crane and Boom Tender feature a fully assembled 250-ton steam crane & separate car with boom tender. The crane can swivel 360 degrees for complete prototypical action and be raised and lowered to suit your scene.

#### Crane car features:

- Detailed painted chassis, cab, and boom arm with precision graphics
- Crane swivels 360 degrees

## East Broad Top - The Rockhill Limited **NEW**

*an E-Z Track® set with E-Z Mate® couplers*

Item No. 25026 • Suggested price: \$499.00

Commencing operations in 1872 to transport coal from the rich mountain deposits of central Pennsylvania, the East Broad Top Railroad also played an important role as a common carrier for passengers and carload freight. Following closure in 1956, the railroad was reopened as a tourist passenger operation which lasted until 2011 when the rails fell silent once again. In 2021, the railroad returned to service for a second time, with steam returning in 2023. Today, the line operates as the oldest and most complete surviving narrow gauge railroad east of the Mississippi. The Rockhill Limited pays tribute to both the history of the line and its role as a tourist railroad, featuring a 2-6-0 steam locomotive with operating headlight, a combine car and coach car in the railroad's current scheme, a 56" x 38" oval of snap-fit nickel silver E-Z Track®, and a power pack, speed controller, and illustrated instruction manual.

## East Broad Top - Freight

*an E-Z Track® set with E-Z Mate® couplers*

Item No. 25025 • Suggested price: \$499.00

Celebrating the East Broad Top Railroad's historic return to steam in 2023, the East Broad Top - Freight set is inspired by both the revenue-service mixed freights operated until the closure of the railroad as a common-carrier in the 1950s, and the recreation freights and photographer specials put on by the EBT Foundation on the reopened line today. The set features freight rolling stock based on cars original to the railroad that can still be found in the preserved collection, arriving complete with a 2-6-0 steam locomotive with operating headlight and tender with coal load, tank car, two-bay steel hopper, and caboose. Also included is a 56" x 38" oval of snap-fit E-Z Track®, magnetically operated E-Z Mate® couplers on all cars, power pack and speed controller, and an illustrated instruction manual.

### 14-TON TWO-TRUCK STEARNS-HEISLER (SOUNDTRAXX® TSUNAMI2™ DCC SOUND EQUIPPED)

Price to be announced

First manufactured in the late 1890s, the 14-Ton Stearns-Heisler was an early adaptation of the design and one of the smallest to be manufactured. Like other geared steam locomotives, the Heisler was well-received among industrial operators. The geared design allowed the locomotive to haul loads on steeper-than-average grades, and the short length of the 14-Ton Stearns variation allowed for extremely tight turning radiuses, making them particularly popular with logging companies. The Bachmann 14-Ton Two-Truck Heisler returns to our On30 Narrow Gauge line with newly added Soundtraxx® Tsunami2™ DCC, new road names, and never-before-offered paint schemes.

#### Features include:

- Soundtraxx® Tsunami2™ DCC sound-equipped
- Dual-mode NMRA-compliant decoder for DCC and analog operation
- Soft-white LED directional headlight and tender backup light
- Coreless motor
- All-gear drive
- Enclosed gearbox
- Separately applied handrails, stanchions, piping, whistle, and more
- Magnetically operated E-Z Mate® Mark II couplers
- Blackened metal wheels with RP25 contours

Suggested price: \$85.00 each

Designed and manufactured by the East Broad Top Railroad in their Orbisonia shops, the 3-Bay Hopper was built to enable the railroad to efficiently haul more tonnage of coal than was possible in their existing 2-Bay Hoppers. Today, many examples remain on the East Broad Top, seeing use on demonstration freights or maintenance trains, while a large number have found a second life further afield. From Colorado to Alaska, and even as far as Hawaii, the EBT 3-Bay Hopper can be found primarily in ballast service, helping to restore and maintain the right of way on numerous historic narrow gauge lines.

**Features include:**

- new and existing tooling
- highly detailed painted bodies with precision graphics
- separately applied details
- magnetically operated E-Z Mate® Mark II couplers
- blackened machined metal wheels with RP25 contours

## GE DASH 9 DIESEL LOCOMOTIVE (1:29 SCALE)

Performs best on 10' diameter curves or greater.

Suggested price: \$1549.00 each

The Dash 9 locomotive, keeping in line with additional locomotives produced under a "dash" name, was given its memorable moniker by General Electric upon its release in 1993. Simple and reliable, the model proved immensely popular, with over 2,500 in operation in the United States at its peak. Today, there's a good chance any Class I freight train you encounter will be led by a Dash 9. This locomotive enters Bachmann's *Big Haulers*® lineup featuring an advanced nonproprietary plug-and-play electronic printed circuit board to accommodate the control system of your choice, including conventional DC power, NMRA/NEM DCC, and/or RC operation.

### Additional features include:

- advanced nonproprietary plug-and-play electronic printed circuit board to accommodate the control system of your choice, including conventional DC power, NMRA/NEM DCC, and/or RC operation
- 1:29 scale, 45mm gauge
- two three-axle ball-bearing power trucks
- two motors per truck with low amperage draw
- all-wheel pickup and all-wheel drive
- operating diesel smoke unit
- white LED directional headlights, front and rear
- lighted front ditch lights
- lighted front number boards
- interior cab lighting and interior cab details
- lighted porch, walkway and step safety lights

## EMD GP40 (1:29 SCALE)

Performs best on 5' diameter curves or greater.

Suggested price: \$1449.00 each

The GP40 is one of EMD's most successful 4-axle road switchers. Initially entering service in 1971, production lasted through 1986 when, after construction of almost 3000 units, the final GP40-2 was rolled off the production line. Today, the GP40 series continues to remain crucial to the switching and branch line needs of class one railroads, in addition to short lines and industrial operators. The Bachmann Large Scale GP40 arrives in 1:29 scale with realistic detail, a non-proprietary plug-and-play circuit board for the control system of your choice, and four authentic modern-era paint schemes.

### Features include:

- advanced non-proprietary plug-and-play circuit board to accommodate the control system of your choice, including conventional DC power, NMRA/NEM DCC, and/or RC operation
- one motor per truck with low amperage draw
- operating diesel smoke unit
- white LED directional headlights, front and rear
- lighted front number boards
- interior cab lighting and interior cab details
- solid-metal railings and lift rings
- opening side windows
- windshield wipers, see-through steps, and MU hose detailing
- operating AAR knuckle couplers
- factory-installed speaker with wire pigtail to allow easy installation of optional aftermarket sound

### TWO-BAY OFFSET HOPPER with REMOVABLE COAL LOAD (1:29 SCALE)

Price to be announced

Designed by the American Association of Railroads as a standardized open hopper for transporting coal, the Two-Bay Offset Hopper could haul considerably larger loads than its predecessors. First appearing in the mid-1930s, these cars and future derivatives of the design would continue to operate in various capacities ranging from their original purpose of handling coal to hauling ore, ballast, and maintenance loads through the 1970s. Many examples of this popular design remain in existence to this day at museums and excursion railroads. The Bachmann Two-Bay Offset Hopper is scaled to standard gauge dimensions for operation alongside other models in our 1:29 Scale rolling stock line and features compatible AAR knuckle couplers.

#### Features include:

- Removable coal load
- Separately applied brake wheel
- Era-appropriate trucks
- AAR knuckle couplers
- Blackened metal wheels

**SINGLE-DOME TANK CAR (1:29 SCALE)**

Suggested price: \$229.00 each

Designed to haul a wide variety of liquid loads, tank cars have been a crucial element of freight railroading since the pioneer era, hauling water, oil, gasoline, and other commodities that were invaluable for shaping the nation and the continent. The tank cars featured in this release represent some of the last single-dome examples built with a riveted tank design, delivered between the late 1920s and early 1940s. Found across North America, the Bachmann *Big Haulers*® 1:29 Scale Single-Dome Tank Car represents these cars in their heyday, when they served a wide variety of owners with colorful paint schemes.

## HO SCALE PLASTICVILLE® U.S.A. 75TH ANNIVERSARY COMMEMORATIVE KITS

2022 marked 75 years since Bachmann paved the way in providing injection molded plastic scenery items for model railroaders with Plasticville® U.S.A. buildings and kits. From stores and homes to farms and railroad structures, the no-stress, easy-to-assemble designs have endured in popularity, and our line continues to incorporate many of the same nostalgic items that your parents or grandparents may have assembled. In celebration of 75 years, we're releasing a limited line of some of our most popular items based on their appearance in original product illustrations, complete with collectible 75th-anniversary packaging.

## O SCALE PLASTICVILLE® U.S.A. KITS

Since 1947, hobbyists and collectors have made *Plasticville® U.S.A.* products their structures of choice. *Plasticville®* pieces add character and dimension to your O scale layout. Many buildings and accessories have been added to the *Plasticville®* line throughout its history, and many are still produced from their original molds. As a fun challenge to collectors, you can collect hundreds of product, color, and packaging variations that have occurred over the years (you can even join the independent *Plasticville* Collectors Association at [plasticvilleusa.org](http://plasticvilleusa.org)). Whether you're new in town or an established civic leader, Bachmann builds *Plasticville® U.S.A.* for you. City growth is limited only by your imagination!

**E-Z COMMAND® PLUS DCC CONTROLLER**

Item No. 44933 • Suggested price: \$265.00

Bachmann Trains is pleased to offer the next generation of the *E-Z Command®* DCC control system; *E-Z Command® Plus*. With *E-Z Command®*, digital control of speed, lighting, sound, and direction of multiple locomotives is at your fingertips, as well as remote control of Bachmann *E-Z Command®* DCC-equipped turnouts. *E-Z Command®* simplifies the programming process for locomotives with one-button, on-track programming and now features the ability to control up to 29 decoder functions per locomotive. Additional features of the *E-Z Command® Plus* system include 128-speed steps for smooth operation and plug-in wiring for simple setup, single-locomotive emergency stop in addition to full-track emergency stop, an LED lighted speed indicator, and new LED push-button controls. *E-Z Command®* will operate all DCC-equipped Bachmann locomotives as well as NMRA-compliant DCC locomotives from other manufacturers.

**Features include:**

- digital control of multiple locomotives in N, HO, and On30 Scale (*E-Z Command®* 5 Amp Power Booster, Item No. 44910, required for O Scale and Large Scale operation)
- digitally control speed, direction, lighting, and sound
- on-track programming
- 128 speed-step locomotive control
- LED speed indicator display
- both individual locomotive and full-track emergency stop buttons
- up to 29 control functions
- Bachmann *E-Z Command®* DCC-equipped turnout control
- wall pack power supply
- plug-in wiring

**E-Z COMMAND® 5 AMP POWER BOOSTER**

Item No. 44910 • Suggested price: \$489.00

The *E-Z Command®* 5 Amp Power Booster provides extra current to the track for an increased number of DCC locomotives on your HO, N, O, or Large Scale layout. Compatible with any NMRA-compliant DCC system.

**E-Z COMMAND® AUTOMATIC REVERSE LOOP MODULE**

Item No. 44912 • Suggested price: \$109.00

This *E-Z Command®* accessory eliminates the complicated wiring previously needed to operate analog reverse-loop track layouts.

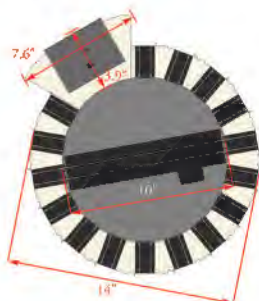

- module senses train as it moves along the loop, automatically switching polarity to allow reverse loop travel
- DCC use only

## E-Z COMMAND® DIGITAL COMMAND CONTROL SYSTEM (continued)

**HO DCC-EQUIPPED TURNTABLE**

Item No. 46298 • Suggested price: \$319.00

**This DCC-equipped Motorized Turntable features:**

- DCC-equipped with dual-mode NMRA-compliant decoder
- track powered from track position number 4 (separate power supply not required for DCC operation)
- 16 nickel silver track positions
- gear drive
- turntable indexed to each track section for accurate alignment
- painted maintenance building
- prototypical operator's cabin
- designed for use with Bachmann's E-Z Track®
- easily adaptable to other popular track systems
- spring-loaded direction switch and wires provided for DC (analog) operation if desired

**DCC CONTROL BOX with TURNOUT DECODER**

Item No. 44949 • Suggested price: \$39.00

- compatible with N, HO, On30, and O scales

This control box with turnout decoder allows you to upgrade your electrically operated analog turnouts to DCC quickly and easily. To upgrade, simply replace your analog switch box with this decoder-equipped control box. Once connected, you can assign a decoder address and operate the turnout through your DCC system. Compatible with N, HO, On30, and O scales.

**HO SCALE TRACKSIDE TURNOUT DECODER**

Item No. 44950 • Suggested price: \$48.00

This HO scale trackside turnout decoder lets you upgrade your electrically operated analog turnouts to DCC quickly and easily. With a decoder installed inside the trackside structure, this flexible design can be used in two ways; plug-and-play use with Bachmann's E-Z Track® system is available by snapping off break-away tabs at the bottom of the structure and plugging into the structure the appropriate wires from your track power source and turnout section. Alternatively, you can make the same connections by soldering to easily hide the wires through a hole under your layout. Once connected, you can assign a decoder address and operate the turnout through your DCC system.

## POWER PACKS

**POWER PACK and SPEED CONTROLLER**  
(appropriate for N, HO, and On30 scale trains; not DCC compatible)  
Item No. 44211 • Suggested price: \$105.00

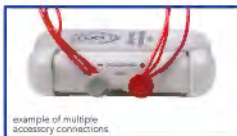

**LARGE SCALE POWER PACK and SPEED CONTROLLER**  
(appropriate for Large Scale trains; not DCC compatible)  
Item No. 44217 • Suggested price: \$105.00

## 16V DC MULTI-ACCESSORY POWER SUPPLY

Item No. 44219 • Suggested price: \$65.00

Now you can power multiple accessories from one convenient power supply.

- several accessories can be attached to each side of the power supply for up to 1 Amp total load
- typical 16V DC accessory attachments are approximately three per side (six total)
- for use with all scale accessories

Item No. 99984

### Lubricants for Model Railroad Professionals

For the best care and maintenance of metal-to-metal and other moving parts on motive power, rolling stock, and track, Bachmann has a full line of premium-grade lubricants. Four E-Z Lube® products are offered:

- ◆ light gear oil
- ◆ heavy gear oil
- ◆ heavy duty grease
- ◆ conductive contact lubricant

Each of the lubricants has a specific purpose. We recommend Bachmann's Light Gear Oil (Item No. 99984) for use on all gears, bearings, valve gears, and side rods. Our Heavy Gear Oil (Item No. 99983) lubricates for extended periods of time and should be used for larger locomotive gears only. For applications requiring heavier viscosity products, such as Large Scale gears, it is best to use heavy-duty Grease (Item No. 99982). And for superior electrical pickup, contact maintenance, and track cleaning, your choice is Conductive Contact Lube (99981).

With proper maintenance, you can extend the life and enjoyment of your railroad equipment for many, many years. We urge you to establish a sensible maintenance schedule and to use our E-Z Lube® products for professional care.

## RINGLING BROS. and BARNUM & BAILEY™

While many circuses were able to expand because of the efficiency of rail transportation, it was only the merger of Ringling Brothers and Barnum & Bailey in 1919 that created a colossal train of over 90 cars! For nearly 100 years *The Greatest Show on Earth™* traveled by rail to thrill millions of circus-goers all across the country. Bachmann is delighted to bring you these vintage *Ringling Bros. and Barnum & Bailey™* models that let you experience all the excitement of the *Ringling Bros.®* train coming to town!

**3-DOME WATER CAR #103**  
Item No. 47120 • Suggested price: \$74.95

**GONDOLA #120**  
Item No. 47212 • Suggested price: \$74.95

**RINGLING BROS. and BARNUM & BAILEY™ CLOWN CAR**  
Item No. 42730 • Suggested price: \$99.95  
(See E-Z Street® Vehicles section for additional information.)

Now your model town or city can get moving with the *E-Z Street*® track system and *E-Z Street*® vehicles.

The *E-Z Street*® modular system snaps together to create realistic one-lane or two-lane roads and intersections. Some suggested configurations include using four sections of 90 Degree Crossover Track (Item No. 00268) to form a two-lane four-way intersection. The 16" diameter curves (Item No. 00261) nest inside the 21" diameter curves (Item No. 00262) for realistic two-lane roads. When planning your track layout, note that you need to use 2.5" Straight to Curve Track (Item No. 00264) anytime you want to connect straight track (5" Straight, Item No. 00266 or 10" Straight, Item No. 00267) to a curved section.

To add power to your *E-Z Street*® system, you must connect Power Wires (Item No. 00270) to the underside of a section of 10" Straight Track (Item No. 00267). If you would like to create an urban siding off of your track mainline, use our "To Track" Connector Pins (Item No. 00272) to connect to an O Gauge or O-27 tubular track system.

From open rural highways to busy city downtowns, *E-Z Street*® offers limitless possibilities for fun!
